

# Turbine Problem Scenario

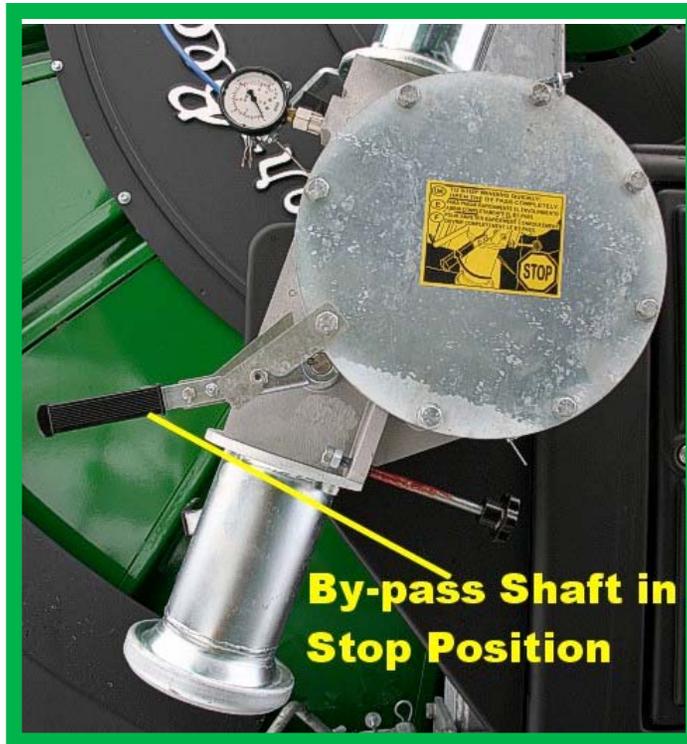

---

**Problem:**  
**Turbine will not run**

# Turbine Problem Solutions

- Check by-pass shaft to make sure it is operating correctly

# Turbine Problem Solutions

- Ensure that the Speed Compensator is adjusted properly and moves freely

# Turbine Problem Solutions

---

- With water source shut off, check the turbine shaft to see if it spins freely

# Turbine Problem Solutions

---

- If running on lower flows; make sure belt setting is on the small pulley on the turbine and large pulley on the gearbox
- Make sure the correct nozzle size is being used in the sprinkler
